CLIMACT Goes to COP31: Bringing the Student Voice to the UN Climate Conference in Antalya

Antalya, November 2026 – The Erasmus+ project CLIMACT will take part in COP31, the United Nations Climate Change Conference, which takes place in Antalya, Türkiye, from 9 to 20 November 2026 at the Antalya EXPO Center. Representatives of the coordinating university, the Technical University of Munich (TUM), and of the Turkish partner IDDA – Innovation and Digital Development Association will present the project to the international climate community.

Why COP31 matters for CLIMACT

COP31 brings together governments, scientists, businesses, civil society and young people from almost every country in the world. For CLIMACT, it is the ideal place to show how universities can do more than teach about climate change: they can train young people to act on it.

What we will present

At COP31, the CLIMACT team will present the project's student journey from classroom to climate action:

- **Learn:** 14 online micro-modules with digital badges and a joint certificate.
- **Team up:** 16 interdisciplinary student teams at eight universities.
- **Build:** a 7-day International Climate Camp in Munich, where ideas become prototypes.
- **Grow:** post-camp mentoring, podcasts and AI animations by students.
- **Influence:** policy recommendations for universities across Europe.

Let's connect

The team will use COP31 to meet universities, cities, NGOs and companies that want to host a student team, mentor a prototype or use CLIMACT's open learning tools. Anyone interested is warmly invited to visit us and talk to the team.

Meet us at COP31:

CLIMACT brings together eight partners from eight countries: TUM (Germany, coordinator), IDDA (Türkiye), International Hellenic University (Greece), University of Ljubljana (Slovenia), University of Stavanger (Norway), Riga Technical University (Latvia), Hryhorii Skovoroda University in Pereiaslav (Ukraine) and University of Molise (Italy).
